GIB AM EMERGING MARKETS ACTIVE ENGAGEMENT FUND - I2 USD (C)
A sub-fund of AMUNDI UCITS FUND PARTNERS ICAV

ISIN code: (A) IE0009Z3U7Y5

This ICAV has appointed Amundi Ireland Limited, an entity part of Amundi Group, as its Management Company

Objectives and Investment Policy

The Sub-Fund is a financial product that promotes ESG characteristics pursuant to Article 8 of the Disclosure Regulation.

The Sub-Fund's investment objective is to achieve capital growth.

The Sub-Fund invests mainly in equities and equity related securities (such as common stock, depositary receipts and preferred shares) predominantly issued by issuers listed, domiciled, or conducting significant business in Emerging Markets that offer undervalued long-term prospects and present opportunities for improved sustainability through active engagement. These investments have the potential to create value through active engagement with the issuer on a wide range of environmental, social, and governance ESG ("ESG") and other issues bespoke to the issuer's business.

A maximum of 20% of the Sub-Fund's net asset value may be invested in equities and equity related securities of issuers listed, domiciled, or conducting significant business in a frontier markets country (countries defined as such by the MSCI Frontier Markets Index), up to 10% of Sub-Fund's net asset value may be invested in securities listed or traded on the Moscow Exchange and up to 30% of the Sub-Fund's net asset value may be invested in A-share of People's Republic of China companies listed on the Shanghai-Hong Kong Stock Exchange via Stock Connect.

The Sub-Fund may hold cash and instruments that may be readily converted to cash (such as cash deposits, treasury bills, investment grade government bonds). In normal market conditions, such investment shall not exceed 20% of the Sub-Fund's net asset value.

The Sub-Fund may use derivatives such as futures, forwards, options and total return swaps for efficient portfolio management purposes only.

Benchmark : The Sub-Fund is actively managed and uses the MSCI Emerging Markets Net Total Return Index (USD) (the "Index") for performance comparison purposes only. The Sub-Fund's portfolio is not limited to, or constrained by, the constituents of the Index. The Sub-Fund has not designated the Index as a reference benchmark for the purpose of the Sustainable Finance Disclosures Regulation.

Management Process : Firstly, companies that derive more than a de minimis proportion of their revenues from operations relating to weapons, fossil fuels, adult entertainment, tobacco, alcohol production, gambling, and any other products and services determined by the Investment Manager to negatively impact sustainable improvements are excluded from the investment universe.

Following these exclusions, Gulf International Bank (UK) Limited, the Sub-Fund's investment manager (the "Investment Manager"), aims to achieve the Sub-Fund's investment objective through a bottom-up approach to high conviction, active emerging markets (countries defined as such by the Index) and frontier markets investing by identifying companies with underappreciated sources of growing cash flow, and engaging with them on ESG issues and a range of other issues likely to enhance shareholder value.

The Investment Manager undertakes a quantitative screening process that tests the issuer's earnings quality, cash flow and capital structure strength when selecting the Sub-Fund's holdings from the investment universe. A qualitative analysis is then performed to determine whether the issuer is significantly undervalued.

Issuers held in the Sub-Fund's portfolio will be subject to the Investment Manager's active engagement process, involving constructive and purposeful dialogue with issuers focusing on improvements in their approach to ESG-related issues and optimising other business practices with a view to improving sustainability and enhancing value.

This is achieved through direct interaction with issuers through meetings and on-site visits, presentations, publication of whitepapers and letters to management alongside proxy voting. The implementation or disregard by the issuer of the suggestions made by the Investment Manager is ultimately up to the issuers management and there can be no guarantee that the Investment Manager's suggestions will be implemented by the issuer.

The Investment Manager will analyse each issuer to identify the most relevant and material ESG risks factors to its business and engages with management to share suggestions in respect of their establishment of a long-term sustainability plan. The Investment Manager pursues this engagement approach because it believes that mitigating ESG risks and improving an issuer's performance on ESG issues will ultimately give rise to higher company valuations and maximise shareholder returns.

This is a non-distributing share class. Investment income is re-invested.

The minimum recommended holding period is 5 years.

Investors may sell on demand on any business day in Ireland.

Risk and Reward Profile

The level of risk of this fund reflects mainly the risk of the Emerging Markets countries in which it is invested.

Historical data may not be a reliable indication for the future.

Risk category shown is not guaranteed and may shift over time.

The lowest category does not mean 'risk free'.

Your investment does not benefit from any guarantee or protection.

For un-hedged currency classes, exchange rate movements may affect the risk indicator where the currency of the underlying investments differs from the currency of the share class.

Important risks materially relevant to the Sub-Fund which are not adequately captured by the indicator:

- Emerging Markets risk : Some of the countries invested in may carry higher political, legal, economic and liquidity risks than investments in more developed countries.
 - Liquidity risk: in case of low trading volume on financial markets, any buy or sell trade on these markets may lead to important market variations/fluctuations that may impact your portfolio valuation.
 - Counterparty risk: represents the risk of default of a market participant to fulfil its contractual obligations vis-à-vis your portfolio.
 - Operational risk: this is the risk of default or error within the different service providers involved in managing and valuing your portfolio.
 - Currency risk : the Sub-Fund invests in securities that are issued in currencies other than the base currency of the shareclass. As a result the shareclass is subject to currency risk, which arises from changes in the exchange rates.
- The occurrence of any of these risks may have an impact on the net asset value of your portfolio.
