## Investment objective

The GIB AM European Fund Focus aims to outperform the MSCI Europe Index over the long-term by identifying and investing in a group of companies that, in the manager's view, demonstrate consistently strong qualitative (purpose & values) and quantitative characteristics (ROCE & growth). Central to this investment approach is a fundamental focus on corporate culture as a source of competitive advantage.

Main risks: The risks materially relevant to the product are equity risk, emerging market risk, volatility risk, concentration risk, depositary risk, investment fund risk, sustainable investment risk, efficient portfolio management risk and financial markets and regulatory change risk.

## Investment Process

The GIB AM European Focus Strategy incorporates two types of opportunities for value creation:

**Compounding:** We identify a small group of companies that we believe will drive superior long-term growth in per share intrinsic value, generated from consistently above-average returns on capital allied to strong reinvestment potential.

**Quality Value:** We identify nearer-term opportunities based on what we consider to be demonstrably undervalued businesses, with fundamentally sound economics. These companies typically find themselves at an inflection point – predominantly with respect to their return on capital, but potentially also their growth rate.

## Risks

The risk indicator assumes you keep the product for 5 years. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

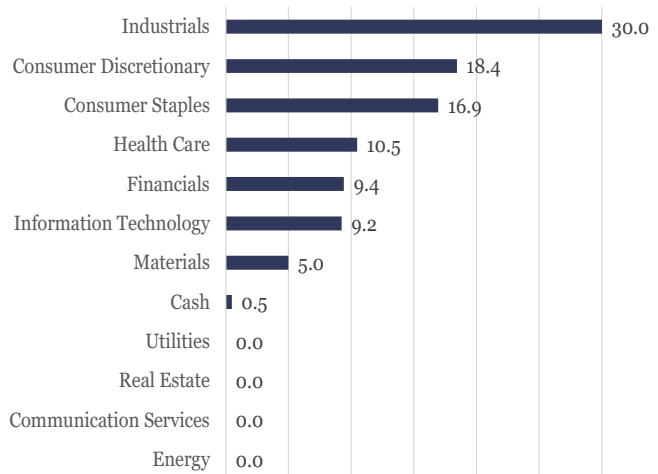

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you. Additional risks: Market liquidity risk could amplify the variation of product performances. This product does not include any protection from future market performance so you could lose some or all of your investment. Beside the risks included in the risk indicator, other risks may affect the Sub-Fund's performance. Please refer to the **Prospectus** for complete information on the investment policy, objectives and strategy of the Fund.

\*The Class SE Shares in the Sub-Fund are available for subscription for a period of six months from the Fund's launch date, or on reaching assets of USD \$100,000,000, whichever occurs first, after which will be closed for subscription. Please note that the characteristics and investor eligibility requirements for this Class as set out in the section of the [Prospectus](#) entitled "Share Dealings", are not applicable to the Classes in the Sub-Fund. Please note, numbers are rounded to two decimal places. Breakdowns are as of 30.06.2023. The Portfolio is actively managed. Sector and country allocations will vary over other periods and do not reflect a commitment to an investment policy or sector. Portfolio holdings should not be considered as a recommendation to buy or sell individual securities and are subject to risk. Individual figures may not total due to rounding. For more product-specific information, please refer to the Sustainable Investing section of the [Prospectus](#). The Fund does not invest in securities that qualify as environmentally sustainable under EU Taxonomy.

## Performance Scenarios

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Sub-Fund over the last 5 years. Markets could develop very differently in the future. The stress scenario shows what you might get back in extreme market circumstances.

What you get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The figures shown include all the costs of the product itself, but may or may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

This type of scenario occurred for an investment using a suitable proxy.

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

The table shows the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10,000 is invested.
