The above schedule of non-dealing days for 2024, covers holiday dates in local markets, where the relevant local stock exchanges and / or Regulated Markets are closed for trading and settlement. The day preceding a holiday may also be impacted, and may therefore also be included. All funds include UK and Irish bank holidays. Additionally, some funds also include other relevant local market holidays.

*If a box is filled yellow, it denotes a holiday which in the current year falls on a weekend, and is therefore already a non dealing day. When this date falls on a weekday, it will be included as a non-dealing day.
